Preliminary

The ERG E2645 (E200II Series) dc to ac inverter is specifically designed to power the Optrex DMF50961 Series of LCD displays to a moderate brightness level from a +12 volt dc source.

The E2645's small size, encapsulated package makes it the ideal power source for applications where small size, high efficiency and reliability are critical.

This inverter is designed to satisfy the most common cold-cathode lighting requirements for the Optrex DMF50961 Series of displays. Custom units, providing different inputs, outputs or package refinements are available.
